## Downstream Notification Report

NPDES Permit No: MA0100633

Date of Event:

Mon, Apr 23, 2018

Kevin Brander, Massachusetts DEP

Nihar Mohanty, Massachusetts DEP

Jeff Kennedy, Mass Division of Marine Fisheries

Doug Koopman, United States EPA

Todd Borci, United States EPA

Aaron Fox, Lowell Water Utility

Mark Young, Lowell Water Utility

Tom Kawa, Lowell Water Utility

Mike Stuer, Lowell Water Utility

Rick Toohey, Lowell Water Utility

Marlene Ladderbush, Tewksbury Water Plant

James McSurdy, Andover Water Plant

Thomas Lannan, Methuen Water Plant

Dan DiNicola, Lawrence Water and Sewer

Brian Pena, Lawrence Water and Sewer

Rusty Russell, Merrimack River Watershed Council

Dear Environmental Professionals and Interested Parties:

This report describes high-flow treatment performed at Lowell's Duck Island Clean Water Facility, as well as discharges of untreated Combined Sewer Overflows (CSOs) at the Utility's diversion structures. High-flow treatment refers to combined stormwater and sewage that receives screening and clarification before being mixed with water receiving biological treatment. This mixture is then disinfected and discharged into the Merrimack River in full compliance with permit requirements. CSO diversions are an untreated mixture of stormwater and dilute sewage that is discharged directly into nearby receiving waters when the capacity of the treatment and transport systems are exceeded as a result of heavy rain. These diversions occur only when necessary to protect public health and safety.

Wastewater Flow to Duck Island		
Daily Flow Rate (MGD)	Peak Hourly Flow Rate (MGD)	Instantaneous Peak Flow Rate (MGD)
37.18	40.99	54.48

Precipitation at Duck Island			
Daily Total (in)	Duration Total (hr)	Average Intensity (in/hr)	Peak Intensity (in/hr)

High-Flow Treatment Summary	
Duration (Minutes)	Volume (MG)
21	0.10

Combined Sewer Overflows Summary	
Maximum Duration (Minutes)	Volume (MG)
0	

Person Reporting Event: Greg Coyle - Lowell Water Engineering
